How can I force the rendering of OSM?

1. show the part of OSM in your browser where you made the changes
2. mouse -> right button -> klick
3. copy URL
4. open a new TAB
5. insert the URL in the URL - line
   see: http://b.tile.openstreetmap.org/18/141359/93453.png/
6. press ENTER and you see the area you selected

NOW

7. add behind the http://b...18/141359/93453.png/ a „dirty“

8. press ENTER
   AND
9. you can read ... „Tile submitted for rendering“

10. READY ... delete the /dirty from the URL and reload the page ;-)
