<p><b>21)Roundabout</b>          There are different ways of representing roundabouts depending on their size. The segments in the way must go around the roundabout in the direction the traffic flows, but there is no need to tag them as <code>oneway=*</code>. The way should then</p>		<table border="1"> <thead> <tr> <th colspan="2">Highways/Streets/Secondary ...</th> </tr> <tr> <th colspan="2">Highways/Streets/Roundabout ...</th> </tr> <tr> <th>Schlüssel</th> <th>Wert</th> </tr> </thead> <tbody> <tr> <td>highway</td> <td>secondary</td> </tr> <tr> <td>junction</td> <td>roundabout</td> </tr> <tr> <td>ref</td> <td>L 132</td> </tr> </tbody> </table>	Highways/Streets/Secondary ...		Highways/Streets/Roundabout ...		Schlüssel	Wert	highway	secondary	junction	roundabout	ref	L 132					
Highways/Streets/Secondary ...																			
Highways/Streets/Roundabout ...																			
Schlüssel	Wert																		
highway	secondary																		
junction	roundabout																		
ref	L 132																		

be tagged with `junction=roundabout`.

The way should also be tagged with the same `highway=*` tag as the connecting streets. If there are several streets of different importance connecting to the roundabout, you should usually use the one with greater importance (so a roundabout connecting unclassified roads and a primary road should be tagged as `highway=primary`). A roundabout must have a `highway=*` tag in order for routing software to use it.

## Very special keys ... ;-)

`xmas:feature=` market  
`xmas:name=`Marché de Noel ...  
`xmas:open_date=` ...  
`xmas:opening_hours=` ....

see WIKI:  
<http://wiki.openstreetmap.org/wiki/Key:xmas:feature>

See RED point at Place d'Armes in Luxembourg (visible in JOSM)
